

# Architecture & Azure resources

Name	Type	Location
dapr-servicebus-identity-test2	Managed Identity	East US 2
introspect1b-servicebus-test2	Service Bus Namespace	East US
introspect1bdaprenvtest2	Container Apps Environment	East US 2
mantasintrospect1bacrttest2	Container registry	East US 2
order-service-app	Container App	East US 2
workspace-introspect1btest2uhDK	Log Analytics workspace	East US 2

Here is a diagram explaining communication between components. ACR is displayed to stress what I build and deploy on my own as opposed to Azure provided dependencies.

## Test

Product-service is invoked through http POST. The sent payload is later sent through DAPR to order-service - see how the JSON with order details is reflected in different services.

```
Terminal  order-service ×  product-service ×  cicd ×  RunMarkdown ×  + ×

2132048@LT-HYFF2JXP9V-DEV cicd % curl -X POST https://$(az containerapp show --name product-service-app --resource-group $RESOURCE_GROUP --query properties.configuration.ingress.fqdn --output tsv)/order-products \
-H "Content-Type: application/json" \
-d '{"productId": "1", "quantity": 10, "customerId": "mantas"}'
WARNING: The behavior of this command has been altered by the following extension: containerapp
{"message": "Order created and event published"}
2132048@LT-HYFF2JXP9V-DEV cicd % curl -X POST https://$(az containerapp show --name product-service-app --resource-group $RESOURCE_GROUP --query properties.configuration.ingress.fqdn --output tsv)/order-products \
-H "Content-Type: application/json" \
-d '{"productId": "2", "quantity": 20, "customerId": "foo-bar"}'
WARNING: The behavior of this command has been altered by the following extension: containerapp
{"message": "Order created and event published"}
2132048@LT-HYFF2JXP9V-DEV cicd % curl -X POST https://$(az containerapp show --name product-service-app --resource-group $RESOURCE_GROUP --query properties.configuration.ingress.fqdn --output tsv)/order-products \
-H "Content-Type: application/json" \
-d '{"productId": "3", "quantity": 30, "customerId": "bar-foo"}'
WARNING: The behavior of this command has been altered by the following extension: containerapp
{"message": "Order created and event published"}
2132048@LT-HYFF2JXP9V-DEV cicd %
```
